Thank you for your support!

Our brave little daughter **Anna** was born on April 19, 2026, with a rare, incurable genetic disease — **congenital nephrotic syndrome** caused by changes in both copies of the NPHS2 gene. Her kidneys lose enormous amounts of protein and IgG antibodies every day, which means Anna requires specialized treatment, hospital stays, regular medical tests and daily blood pressure monitoring. She is also particularly vulnerable to infections.

Anna remains under the constant care of nephrologists, neurologists, endocrinologists, gastroenterologists, and attends rehabilitation therapy. In the future, she will require dialysis and a kidney transplant.

Together, we can do more!
Thank you for every bit of support!
