Kawalec, 21010

Thank you for your support!

Phillip was born with low muscle tone, requiring 24/7 care from the beginning. He missed milestones, developed more slowly, and never developed speech. He still doesn't speak. He was diagnosed with autism at age 3.

He is now 5 and is currently being evaluated for a genetic disorder. He has attention deficit hyperactivity disorder, difficulty concentrating, having trouble with balance, and sometimes even controlling his bodily functions.

He is a very happy boy, friendly, and curious about the world around him.

We need numerous therapies to help support his development and help him function better.
