Thank you for your support!

Tymek is battling Duchenne muscular dystrophy (DMD). DMD is a genetic disorder that gradually weakens skeletal muscles, the heart muscle, and respiratory muscles. Tymon is under the coordinated care of many specialists. He takes steroids daily, undergoes rehabilitation, and uses orthopedic support to maintain his mobility for as long as possible.

We are constantly monitoring the possibility of treatment abroad, but the costs of currently available therapies are beyond our reach. We believe that the future will bring effective treatment options, thanks to the support of donors, and we are grateful for any help received.

**By donating 1.5% of your tax or a donation to the Avalon Foundation with the note "Piątek, 19654," you support Tymek in his daily struggles.**
